  - Implemented the sounds using the Fmod event system
  - Linked the play mode UI to gameplay elements (Healthbar, ammo UI damage indicators and spell cooldown)
  - **Itch Page**

Marco Piamonte Cover letter

My name is Marco, I'm a game programmer and I'm applying because I believe that I meet all the requirements for this position.

I have been studying programming since high school and then specialized in Game Programming 2 years ago. During those years I explored a lot of sub-categories of programming such as gameplay, AI, UI, network and animation. I also worked on a bunch of group projects and in one of them we managed to ship the game on Steam, during these projects I strengthened my team working skills and gained a better understanding of the whole pipeline behind making a game.

I've been passionate about video games since I was a child when I got my first Nintendo DS and from there it became my biggest passion and being part of the creation of them would be one of my biggest goals.

Thank you for giving me this opportunity and I look forward to hearing from you

Best Regards,
Marco

Marco Piamonte
